On the eleventh week, we moved on to the employer side. We had troubles at first as to how we will implement RBAC, and how we will integrate our plans. But after a day of pondering, we managed to overcome this hurdle. Currently, we're managing to integrate our plans, we hope for less failure. While the main functionalities are currently working, the end in employer side is still far from over. We will still implement some enhancements for better aesthetics and experience.
